DETAILED ACTION

Applicant's election with traverse of Group I, claims 1-16, 28 and 30 in the reply filed on 5/31/06 is acknowledged. The traversal is on the ground(s) that the claimed inventions fails to place a burden on the examiner for examination purposes. This is not found persuasive because the Groups clearly provide for a general audio format and/or audio representation, or a specific or distinct audio processing (decoding) technique.

The requirement is still deemed proper and is therefore made FINAL.

However among the elected Group I, a species election is required.

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I: N components being at least 3 for the audio signal format.

Species II: N components being at least 10 for the audio signal format.

Species III: N components being at least 20 for the audio signal format.

Species IV: Angle of the directions the audio signal format.

Species V: Distribution of the directions of the audio signal format.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 2615

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species I corresponds to dependent claim 2.
Species II corresponds to dependent claim 3.
Species III corresponds to dependent claim 28.
Species IV corresponds to claims 4-7.
Species V corresponds to claim 8-10.

The following claim(s) are generic: 1, 11-14, and 30.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species I-III are specific to the number of components that an audio signal format comprises, and Species IV is drawn to the angle or geometrical characteristic of the directions of the components, and Species V is drawn to the distribution of the of the audio format in respect the listening quality of the audio signal.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
